

# PANCREAS

**Support your pancreatic wellbeing with ProfBiotics EB\*4**

A vitamin and dietary supplement\* formulation to support pancreatic wellbeing

## EB\*4 PRODUCT INFORMATION LEAFLET

A vitamin and dietary supplement\* formulation to support pancreatic wellbeing.

**Please read this information leaflet and keep it for future reference.**

EB\*4 is not a medicine and does not replace the need to eat a varied and balanced diet or reduce your need to exercise.

EB\*4 is a formulation of vitamin and food supplements.

This leaflet will tell you:

1. What this product is
2. How you should use it
3. How to look after it
4. What to do if you experience an unexpected reaction
5. Where you can get more information

### 1. PRODUCT DESCRIPTION

EB\*4 contains a unique blend of ingredients chosen after expert review.

#### Do supplements work?

There is an extensive body of evidence surrounding each of the ingredients used in this food supplement.

The ProfBiotics team has researched the evidence as it relates to individual vitamins and food supplements, and published its findings in respected peer reviewed medical journals.

This evidence has led to the formulation of EB\*4.

We advocate that the best way to obtain micronutrients is via the diet, however when this is not possible taking a specific supplement such as EB\*4 is appropriate.

#### Ingredients list for EB\*4

Each EB\*4 vegetarian capsule provides:

Curcumin extract	25:1 - 240mg providing 6000mg whole herb equivalent
Selenium (from l-selenomethionine)	100mcg
Green Tea	30:1 - 33.34mg providing 1000mg whole herb equivalent
Rice flour	(excipient)
Vegetable Capsule	Hydroxypropylmethyl Cellulose (HPMC)

Micronutrient	Per daily dose of 2 capsules	Nutrient Reference Value (NRV)	%NRV
Selenium	200mcg	55mcg	364%

#### Why these ingredients?

##### ✓ Curcumin

Curcumin is the active polyphenol ingredient inside the Indian spice turmeric. Curcumin in supplements can provide a higher level of polyphenols than it is possible to obtain from foods alone.

- Helps to maintain the efficacy of the immune system\*\*
- Has significant antioxidant properties\*\*
- Curcumin helps to control inflammatory responses within the body\*\*
- Contributes to better fat digestion\*\*

##### ✓ Green tea

It is widely accepted that phenolic compounds contained in green tea have potential health benefits. Green tea contains several forms of polyphenol flavanols called catechins, of which epigallocatechin-3-gallate (EGCG) is the most abundant.

- Supports metabolism and fat oxidation\*\*
- Powerful antioxidants beneficial to human health, due to antioxidant activity\*\*
- Help to maintain normal blood glucose levels\*\*
- Helps to protect insulin producing glands\*\*
- Maintain healthy digestive system\*\*
- Improve intestinal environment and functionality\*\*
- Maintain healthy gut flora
- Help to increase metabolic rate\*\*
- Helps to maintain healthy BMI\*\*
- Prevent cholesterol absorption\*\*
- Helps to prevent the accumulation of triglycerides\*\*

##### ✓ Selenium

Selenium is a trace element that is naturally occurring and present in many foods. It is important for the body's immune system. People eating meat, fish, eggs or Brazil nuts should ingest sufficient selenium but it is available as a food supplement also.

- Selenium contributes to the normal function of the immune system+
- Selenium contributes to the protection of cells from oxidative stress+

**Rice flour** is used as an excipient. This contributes nothing to the nutritional value of EB\*4 but is necessary in the production of capsules as an anti-caking agent to help ensure that the blend of ingredients is the same in all capsules.

<sup>†</sup>denotes claims adopted from the EU Register on nutrition and health claims

<sup>\*\*</sup>denotes claims from EFSA Article 13.1 botanicals on hold list

*\*Food Supplements do not replace the need for a healthy lifestyle and a varied and balanced diet.*

**Per Container:** 60 capsules  
**Pack net weight** 36g

## 2. RECOMMENDED DOSE

Adults should take 2 capsules daily with a small amount of food containing fat (e.g. olive oil) to aid absorption. Fat in the diet helps the digestive system to absorb curcumin.

Not recommended for children under the age of 18 years.

There is no risk attached to missing capsule doses. You can stop taking EB\*4 at any time.

If you find it difficult to swallow EB\*4 capsules, you can pull the shell apart and sprinkle into foods or drinks containing a small amount of fat.

### Before you take EB\*4

If you are on medication, pregnant, breast-feeding or have a medical condition please consult your medical practitioner before taking this product. Green tea may interact with some medications.

## 3. STORAGE

Do not use if the seal is broken or if packaging is damaged in any way.

### Keep out of reach of children.

To maintain potency, close the lid tightly and store in a cool dry place.

Ideally store under 30°C out of direct sunlight.

## 4. ALLERGY AND ADDITIONAL INFORMATION

In the event that you experience any reaction caused by taking EB\*4 seek the advice of your doctor immediately.

### May contain nuts

Contains vegetables and vegetable derivatives.

Contains maize and maize derivatives.

Contains corn and corn derivatives.

Contains natural caffeine.

Contains rice and rice derivatives.
